Education

MEng Electrical & Electronic Engineering with Management | Imperial College London Oct 2016 – Present

Current Aggregate Result - 2:1

Specialist modules include:

- Machine and Deep Learning
- Mathematics for Signals
- Algorithms and Data Structures
- Algorithms and Complexity
- High Level Programming
- Artificial Intelligence

A-Levels | Abbey College Cambridge

Sep 2014 – Jun 2016

- Further Mathematics – A*
- Mathematics – A*
- Physics – A

GCSEs | Wycliffe College

Sep 2011 – Jun 2014

- 11 passes including A* in Mathematics and Physics.

Work Experience

Quantitative Analyst | Hartree Partners | London, United Kingdom Apr 2019 – Present

- Developing reinforcement learning algorithms for predictive asset optimization and cost reduction.
- Building forecasting models for various parts of the energy markets such as BSUoS and solar generation.

Tutor | Fire Tech Camp | London, United Kingdom

Dec 2018 – Present

- Teaching Python, high quality coding practices and computing skills to young students.
- Developed my verbal communication skills and competency-dependent teaching techniques.
- Leading groups through their first complete coding projects.

Lighting Manager | Imperial College Union | London, United Kingdom

Nov 2017 – Present

- Delivering services in the student bar and nightclub operating and maintaining the lighting system.
- Improved performance of new and existing staff members by providing comprehensive training.

DJ and Music Producer | Freelance | Worldwide

Oct 2016 – Present

- Self-taught DJ and music producer, performing at over 25 events to date.
- Performed at Sysmic Festival Switzerland with over a thousand students, making £400 for the night.
- Other notable nights include Ministry of Sound London and Imperial College Summer Ball.

Projects

Brevan Howard Trading Competition | Personal Project

- The winner of the £10000 grand prize of the seasonal algorithmic trading competition.
- Built environments, environment wrappers and optimised reinforcement learning algorithms from the bottom up.
- Learned various reinforcement learning libraries such as stable-baselines and Ray RLlib to speed up prototyping.

Glovoice | Second Year Group Project

- Project aimed at enabling the deaf community to communicate with those who don't understand sign language.
- Developed a website using Python Flask, coded and integrated a server-side data base using MongoDB.
- Worked with TensorFlow to build a model which predicted the words the user was gesturing.

Data Visualisation with D3 | Personal Project

- Used online resources to teach myself HTML5, CSS3, JavaScript and multiple JavaScript libraries.
- Programmed an interactive worldwide CO₂ emissions dashboard using the D3 JavaScript library.

Relevant Skills

Programming Languages: Python | C++ | C | F#

Operating Systems: Linux Ubuntu | MacOS | Windows

Spoken Languages: English | Russian

Other Interests

A keen cross-country runner and an athlete. First half distance marathon completed in 2014 and a full distance one in 2015 in just above 4 hours. Also, a triathlete and an avid cyclist. Looking forward to completing first Olympic distance triathlon in May 2019.
